Water Heater Maintenance Tips

Filter Cleaning

For smooth flow and purified water, wash the Water Filter Valve thoroughly every month or when necessary.

Monitor RCD Regularly

Check safety indication of RCD before use. This can ensure your safety and prevent further damage to water heater itself.

Switch Off When Not In Use

Switch off water heater after every shower. This will minimise any electrical damage and also save electricity bill.

Water Pressure At Your Fingertips

The built-in pump button allows you to control water circulation easily. Switch it on when water is needed for faster delivery and stable pressure, and off when not in use to save electricity and reduce wear on internal components.

Peace of Mind

Designed for everyday reliability, LIVINOX's water heater delivers consistent warmth, stable performance, and built-in safety, so you can shower comfortably, confidently, and worry-free.

Stepless Power Control

Provides user the ability to adjust the water temperature precisely.

Built-in Residual Current Device (RCD)

In the event of current leakage, Livinox's highly sensitive built-in RCD will cut off both live and neutral power supply.

Inverter DC Pump

In places where water pressure is inherently low, Livinox's state of the art DC pump can help boost water pressure with low noise operation and low energy consumption.

Double Thermal Anti-Scalding System

Our safety system cuts off power whenever the water temperature rises to 55°C (anti-scalding) and 90°C (abnormal overheat).

IP25 Splash Proof

Livinox water heater comes with internationally recognised rating of IP25 protection, rest assured that the internal electronics are always protected against dust and water.

Smart Self-Check Safety Indication

Livinox water heater includes a smart self-check feature that monitors the safety status before and during use. This is shown through a sequence of Power and RCD LED indicators:

MODĚNA Series / DIAMOND Series / Sugar Bloom Series

- Solid Green Light (Earth/RCD): RCD is working correctly. The heater is safe to use.
- Blinking Green Light (Earth/RCD): Indicates a weak or missing earth connection. Stop using the water heater and please contact a qualified technician immediately.
- Blinking Red Light (Earth/RCD): Current leakage detected. The RCD has tripped. Please contact a qualified technician.

Digital Series

- Earth icon light is on: RCD is working correctly. The heater is safe to use.
- Earth icon light is off: Indicates a weak or missing earth connection. Stop using the water heater and please contact a qualified technician immediately.
- Display error code E1 (upon turning on the water heater): Electrical leakage detected. The RCD has tripped. Please contact a qualified technician immediately.

Our product warranty ensures dependable protection, covering defects and performance issues for your peace of mind and long-term confidence.
